WHAT IS YIELD RISE

YieldRise Finance is a disruptive innovating token in Defi with an auto staking token protocol on the Binance Smart Chain with automatic staking, auto rebasing, and auto compounding mechanisms rewarding its holders with a fixed APY of 158,893.59% and a daily reward of 2.04% daily with plenty of mechanisms to sustain the charts and the volume of token in supply and demand.

OUR VISION

Our vision is to create a sustainable rebase token that will stand the test of time. Hence, we would be launching Utilities to mitigate inflation and anti-whale mechanisms like OTC purchases together with other anti-whale mechanisms to ensure the sustainability of the projects

Most of the utilities would rely on Yieldrise tokens as the purchasing power and the revenue, in turn, will be used as extra financial support for the RFV and part will be burnt to create a deflationary position for the contract.

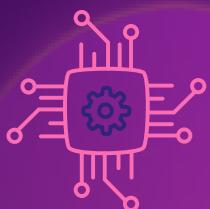

OUR FEATURES

01 FIXED APY OF 158,893.59% ON AUTO STACKING PROTOCOL

The Auto-staking Protocol pays every 30 minutes or 48 times every day to holders giving 2.04% increment in holders' token

03 OTC DEALS

Treasury will be used for OTC deals where some % of the tokens in the OTC deals will be sent to a void wallet (Burning)

02 LIQUIDITY NODE

Even though we have a sustainable 158,893.59% APY which is compounded every 30 minutes... We would avail our holders of the opportunity to get liquidity/nodes which will now be providing more non-removable liquidity for \$Yieldrise token which will in turn gives the nodes holders additional income
